

## 3D DESIGN TECHNICIANS EXHIBIT AT WORTHING MUSEUM

Technicians from Northbrook's 3D Design workshop have been exhibiting their own work at Worthing Museum and Art Gallery. The six technicians are all practising artists and crafts people and each of them has a specialisation. Paul Cox's is metalwork, Lorraine Gibby's is jewellery, Eileen Brown's is ceramics, Paul Chapman's is woodwork and Fleur Grenier's is pewter work. They were joined by Carl Woodward who used to work as an art technician at Northbrook and who contributed some of his paintings. The exhibition, entitled 'Design Workshop', ran from 16th September to 4th November and was organised by Northbrook's 3D workshop supervisor, Dave Pudwell.
